HOW TO USE GUIDE

1.

Turn bottle upside down

2.

Return to upright

3.

Open and pour

- Turn the bottle upside down with the lid firmly on.
- Return to upright position, liquid will be held in the 10ml dosing reservoir on the side.
- Remove lid which blocks off the main bottle and pour the 10ml dose in to the spray bottle.
- Repeat as required.

X 1 = ANTI-BACTERIAL

X2 = ANTI-VIRAL

- One dose makes an Anti-bacterial cleaner and 100 bottles can be made from 1 x dosing bottle.
- Two doses makes an Anti-Viral cleaner and 50 bottles can be made from 1 x dosing bottle.
- Vortex One can be used on all non-food preparation hard & soft surfaces.
- 4 dose can be used in a standard bucket and 6 in a large bucket.

Vortex one reduces the amount of deliveries on the road, one super concentrate bottle makes up to 100 spray bottles reducing carbon emissions and removing single use plastics from landfill.

Every bottle bought can save 9kg of plastic & 1.7 kg of carbon emissions compared to 750ml RTU bottles.

DON'T BIN ME, REUSE ME AGAIN & AGAIN

- When the dosing bottle is empty don't throw it away send it back to be re-used again and cut out landfill.
- Simply put it in an envelope and write on the front **'FREEPOST ORIONECOSOLUTIONS'**
- Pop it in the post and we will do the rest, and say goodbye to landfill.
